SUMMARY

Technical Author and Computer Science Engineer with 1+ years of experience creating developer- and customer-facing documentation for data engineering and AI products. Hands-on with HTML, CSS, JavaScript, Markdown, Git/GitHub, API documentation, and documentation site development. Experienced in cross-functional collaboration and translating complex technical concepts into clear user experiences. Strong interest in web accessibility and accessibility engineering, with a top 0.2% ranking at Anna University (state level).

EXPERIENCE

MATILLION | Technical Author

Jul 2025 - Present

- Create customer-facing and developer documentation for Maia Foundation, an agentic AI data engineering platform, including the Context Engine and related product capabilities.
- Document new features, product improvements, APIs, and technical workflows by collaborating with engineering, product, and subject-matter experts.
- Contribute to the documentation website using HTML, CSS, JavaScript, Markdown, and Git/GitHub, improving navigation, UI, and content presentation.
- Develop AI-assisted automation workflows for documentation review, feedback analysis, content operations, and repetitive processes.
- Use GA4 and PostHog to analyze documentation usage and feedback and identify usability and discoverability improvements.
- Work with GitHub, Jira, pull requests, code reviews, and Agile workflows throughout the documentation lifecycle.

SKILLS

Web: HTML5, CSS3, JavaScript, DOM, Responsive Web Design, Web UI

Documentation: Technical Writing, Developer Documentation, API Documentation, Markdown, Information Architecture, Content Design, Editing

Accessibility: Semantic HTML, WAI-ARIA, Web Accessibility Testing (NVDA, VoiceOver)

Development: React.js, Python, Java, SQL (MySQL, Postgres), Flask

Tools & Platforms: Git, GitHub, Jira, GA4, Looker Studio, PostHog, AWS, VS Code, Maia Foundation.

AI & Automation: AI-assisted Documentation, Workflow Automation, Feedback Analysis

Testing & Debugging: Web Testing, UI Testing, Browser Debugging, Code Review, Postman, OWASP ZAP.

PROJECTS

Farming Assistance System – ML-Based Agricultural Recommender

- Developed a Flask web application using Python, XGBoost, and ResNet for crop and fertilizer recommendations and plant disease diagnosis.
- Built responsive interfaces with HTML, CSS, and JavaScript, integrating weather forecasting and multilingual support through APIs.

Task Planner App (Anime - Themed)

- Designed and developed a responsive task-planning web application using HTML, CSS, and JavaScript with an anime-inspired interface.
- Implemented CRUD functionality with JavaScript and browser local storage, enhancing usability across devices.

University Admit Eligibility Predictor - IBM Guided Project

- Developed a Python and Flask application to predict university admission eligibility using historical admission data and user inputs.
- Built a responsive web interface and integrated data processing for real-time prediction results.

EDUCATION

CARE College of Engineering, Anna University — B.E. Computer Science & Engineering | 2019 – 2023

Top 0.2% — Anna University (State Level)

CERTIFICATIONS

AWS Certified Cloud Practitioner (AWS) · Data Productivity Cloud Foundations (Matillion) · SQL Bootcamp (Udemy) · HTML, CSS & JavaScript for Web Developers (Johns Hopkins) · CSS Skill Assessment (HackerRank)
